

**We found a way for you to get something unexpected for your bottom line.  
More consistent results with Hydrobrite® PVC Oil.**

Sonneborn has introduced Hydrobrite PVC Oil as a cost-effective replacement for paraffin wax in rigid PVC formulations. Approved as a functional equivalent to paraffin wax by the Plastic Pipe Institute and National Sanitation Foundation, Hydrobrite PVC Oil is a straight cut liquid paraffin that is inherently more consistent than paraffin wax. Additionally, extended commercial use of Hydrobrite PVC Oil demonstrates a significant reduction or elimination of plate-out. Sonneborn also provides long-term, consistent supply.

Sonneborn's customers benefit from cost savings through more consistent and predictable processing, reduced scrap, ease of handling, lower maintenance costs and reduced down time.
