REFINED PRODUCTS

POULTRY WAXES

PRODUCT DESCRIPTION

Sonneborn's Poultry waxes are high-tech formulations of paraffin's, microcrystalline waxes and additives. Our experience and knowledge enables us to engineer the most advanced Wax Blends in the world.

APPLICATION

Sonneborn's poultry waxes are especially developed to provide the optimum ease of use in the plucking process for waxed carcasses of wet-footed birds and game. Waxes are available for both wet and dry defeathering techniques. They form a flexible, consistent and adhesive layer on the skin of pre-defeathered birds. The wax layer can be pulled off automatically or by hand, and so remove the remaining pin feathers.

KEY FEATURES AND BENEFITS

- Special poultry waxes for a variety of ducks and geese.
- Developed for plucking by hand or by automatic dry and wet plucking-processes.
- Tailor made wax blends that are designed to meet the needs of your specific application or process.
- Our comprehensive technical support will provide quick and flexible response to specific customer requirements.
- Our waxes are used in combination with machinery from leading poultry processing machinery manufacturers.
- Our poultry waxes are used by leading poultry processors (reference list on request).
- Poultry waxes are available as liquid bulk or in slabs

PURITY

Sonneborn's poultry wax grades meet all purity requirements of BGA, DAB VIII, FDA CFR 172.886 and 178.3710 for food-grade petroleum waxes as well as requirements of the hard paraffin monograph of the European Pharmacopoeia. In addition they meet the requirements of the European Directive for plastic materials intended to come into contact with foodstuffs and comply with recommendations of Colipa.
