### Extinguishing media

Suitable: Treat as an oil fire:  
- dry chemical  
- carbon dioxide (in case of small fires)  
- water fog  
- foam

Unsuitable: Do not use water jet. Oil will float on water and can spread any fire.

### Special fire fighting procedures

Do not direct a solid stream of water or foam into burning material; this may cause spattering and spread the fire. If a rail or tank truck is involved in a fire, ISOLATE for 800 meters (0.5 mile) in all directions. Shut off fuel to fire if it is possible to do so without hazard. If this is impossible, withdraw from the area and let the fire burn out under controlled conditions. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tank due to fire.

### Special protective equipment for firefighters

Self-contained breathing apparatus.

### Unusual fire and explosion hazards

Following products may be produced during a fire: Oxides of carbon.

## 6. ACCIDENTAL RELEASE MEASURES

### Personal precautions

Wear suitable protective equipment.

### Environmental precautions
