Chemistry. By Nature.™

SonneNatural® 200 Series / S-205

Sonneborn further raises the bar on the SonneNatural line of 100% all natural vegetable based emollients. As experts in the development of hydrocarbon based emollients, Sonneborn recognizes the importance of even the most subtle, yet specific differences that are often critical to defining a finished formula. As such, we continue to apply our technical expertise to our growing line of 100% naturally derived emollients.

SonneNatural® H-203, S-205 and J-207 are ideal, natural and renewable offerings for use in personal care and cosmetic applications where an emollient, moisturizer, conditioning agent, solubilizer or dispersing agent is required. All three products provide excellent moisture retention and have a superior UV and microbial stability profile.

SonneNatural® S-205 offers the softest base in applications requiring high slip and maximum playtime.

Special Attributes

- Suitable for petroleum-free formulations
- Very soft with low cushion, high gloss and slip, long playtime and medium spreadability
- INCI name: Vegetable Oil (Olus Oil - EU)

Applications

- Ideal choice for body lotions and massage oils
- Hair pomades with gloss and low hold
- Excellent base for lip gloss
