SonneNatural® Nature's Finest Emollient

SonneNatural offers the sensory, moisture retention, emolliency and rheological properties consumers have come to expect from petrolatum. SonneNatural is an ideal natural and renewable option for use in cosmetic applications where an emollient, moisturizer, solubilizer or dispersing agent is required. The uses for SonneNatural are limitless and offer unique properties that enhance personal care products naturally.

SonneNatural is a soft, translucent-yellow, medium gloss product. It has a creamy application, excellent spread, low tack and cushiony feel. The combination of softness and luxurious feel make this product an excellent natural alternative to petrolatum in cosmetic formulations.

SonneNatural is palm-free and certified by Sonneborn to contain 100% natural ingredients of vegetable origin.

Special Attributes

- Suitable for petroleum-free formulations
- Ideal rheologic properties, similar to petrolatum
- Excellent moisture retention properties
- Superior UV and microbial stability
- Soft, luxurious afterfeel
