Hydrobrite® 1000 PO	Very rich viscous emollient, very glossy, long playtime	White	++++	++++	-	++++	++++	+++	++++

### Terms:

**Richness - Cushion** - Refers to the perceived thickness of product. A product with low cushion will feel like skin on skin contact, whereas a product with high cushion will feel like a layer on top of skin.

**Soft** - Refers to the end feel; the user will feel a soft and moisturized residual.

**Light** - Associated with products that have low cushion. The feeling of skin rubbing against skin during application has a slightly dry feel.

**Lubricious** - Associated with a long play-time and medium to high cushion. This combination of attributes in a product allows it to be moved across the skin and have a perceivable feel on the skin for a long period of time.

**Gloss** - The amount of shine a product leaves on the skin or hair.

**Slip** - The measurement of how a product moves across the skin. Can be measured as low or high (Resistance vs. glide)

**Play-time** - Refers to how long a product will stay on the skin before it is absorbed or evaporates. A long play-time would lend itself to a massage product.
